Project 01: HTML Fundamentals

Evaluation Sheet — Web Document Anatomy & Semantics

Student: _____ **Evaluator:** _____ **Date:** _____

Section 1: Document Skeleton & Standards

index00.html is a strictly valid HTML5 document with , , , meta charset, responsive viewport, and page title exactly '42'. Zero syntax errors.

Check: *"Why is required at the very top of every HTML page?"*

[YES] [NO]

Section 2: Semantic Text Hierarchy

Proper heading hierarchy (h1 down to h3 without skipping levels). Body text uses paragraphs (p), bold importance (strong), italics (em), and thematic breaks (hr).

Check: *"Why shouldn't you use multiple tags on a single simple page?"*

[YES] [NO]

Section 3: Links, Media & Accessibility

Profile picture loads correctly via a relative path. The image includes a descriptive alt attribute. External links open safely with rel='noopener noreferrer', and anchor jump links work.

Check: *"What happens if an image link breaks when you have descriptive alt text?"*

[YES] [NO]

Section 4: Lists & Structured Data Tables

Unordered lists (ul) and ordered lists (ol) are properly nested inside tags. A weekly timetable is built using , , , with scope='col', and with .

Check: *"Why do we avoid using HTML tables for visual page layout?"*

[YES] [NO]

Section 5: Forms & Semantic Layout Architecture

The registration form has text, email, password, radio, and checkbox inputs. All inputs are properly paired with . The full page utilizes semantic landmarks: header, nav, main, section, article, aside, footer.

Check: *"What is the benefit of clicking on a element?"*

[YES] [NO]

Summary & Final Result:
All 4 mandatory sections must be YES to PASS.

RESULT:
[ ] PASS [ ] FAIL
